

An evening presentation with Dr. Thornton Streeter on the Biofield Viewer

Thursday, October 12th, 6:30pm - 8:30pm
At Element Bistro
6315 Lookout Road, Boulder

Thornton Streeter, DSc is the founder and CEO of the Centre for Biofield Sciences (CBS) Ltd. and has spent over a decade doing specialized research on the biofield. This has resulted in the creation of the Biofield Viewer in conjunction with John Catchpole.

The Biofield Viewer is a real-time imaging system that is able to detect and visualize the subtle layers of electromagnetic activity around living systems. This technology is a research tool, which allows interference patterns with bio-plasma to be monitored and studied for optimizing energy treatment protocols and investigating the human biofield.

In this two-hour presentation, Dr. Streeter will explain how the Biofield Viewer works, as well as demonstrate it for us.

The Biofield Viewer:

- reveals the anatomy and physiology of the human biofield, so both practitioners and clients can observe the energetic shifts of the healing process in real time
- allows health practitioners and healers to investigate, monitor and improve their treatment protocols
- has been known to highlight the vitality of the chakras, and meridians, as well as organ systems

Dr. Streeter is a department head at the Zoroastrian College in India, an official representative of the United Nations through ECOSOC and the Asia Coordinator for the Foundation for Alternative and Integrative Medicine.

More information about Dr. Streeter and the Biofield Viewer is available at www.biofieldscience.org, <http://linkingawareness.com/popping-the-bubble-of-doubt> and www.facebook.com/BiofieldViewer/
